Kogumiku on koostanud rahvaloenduse andmetöötlaste, rahvaloenduse metodoloogia ja geoinfosüsteemide sektor.

Rahvaloenduse andmete töötlemisel ning käesoleva kogumiku koostamisel osalesid Väino Kuri, Kristina Känd, Kaljo Laas, Merit Langi, Inge Nael, Kalev Noorkõiv, Svetlana Pavlova, Heino Piiriväli, Mati Sundja, Lembit Tepp ja Tiiu Vallner.

The publication has been compiled by the Population Census Data Processing Section, Population Census Methodology Section and Population Census Geographical Information Systems Section.

Processing of Population Census data and compiling of the present publication was completed with the participation of Väino Kuri, Kristina Känd, Kaljo Laas, Merit Langi, Inge Nael, Kalev Noorkõiv, Svetlana Pavlova, Heino Piiriväli, Mati Sundja, Lembit Tepp and Tiiu Vallner.

RAHVAARVU JA HALDUSKORRALDUSE MUUTUSED AJAVAHEMIKUL 1989–2000

Sissejuhatus

2000. aasta 31. märtsi seisuga läbiviidud rahva ja eluruumide loenduse aluseks oli kaks järgmist seadusandlikku akti:

- Riigikogus 13. mail 1998. a vastu võetud "Rahva ja eluruumide loenduse seadus" (RT I 1998, 52/53, 772; 1999, 101, 901);
- 2000. a rahva ja eluruumide loenduse (edaspidi rahvaloendus) küsimustik, loenduslehtede vormid ja loenduseeskiri, mis kinnitati Vabariigi Valitsuse 5. märtsi 1999. a määrusega nr 82 (RT I, 1999, 32, 431).

Loendusküsimustik koosnes kahest loenduslehest — "Eluruumi- ja leibkonnaleht" ja "Isikuleht" — ning sisaldas 12 küsimust eluruumi ja leibkonna ning 31 küsimust isiku kohta. Loenduslehtedelt saadava andmesisu kohta annab lühiülevaate alljärgnev.

Eluruumi- ja leibkonnalehele märgiti eluruumi aadressandmed, eluruumi elanike nimekiri leibkondade kaupa, leibkonnaliikmete seosed leibkonna viiteisikuga, seaduslikud abikaasad ja vabaabielupartnerid ning laste ja vanemate vahelised seosed; samuti see, kas leibkonnaliige on püsielukohast (alalisest elukohast) ajutiselt (kuni 1 aasta) ära, ja äraoleku kestus kuudes. Eluruumis ajutiselt elavate isikute puhul märgiti kohaloleku kestus kuudes. Eluruumi- ja leibkonnalehe küsimustele antud vastustest saadi andmed eluruumi tüübi, asustatuse, omandilise kuuluvuse, kasutamise aluse, pinna suuruse, tubade arvu, köögi olemasolu ja eluruumi tehnovarustuse liikide kohta; tavaeluruume sisaldava hoone liigi ja ehitusaja kohta. Institutsioonileibkonna puhul märgiti selle tüüp. Tavaleibkonna puhul märgiti, kas leibkonna kasutuses on maad põllu- või aiasaaduste kasvatamiseks, looduslikku rohumaad, metsamaad või põllumajandusloomi.

Isikulehele märgiti isiku sugu, sünniaeg ja püsielukoht, asukoht loendusmomendil, püsielukoht eelmise loenduse ajal (12. jaanuaril 1989), loendatava ja tema vanemate sünnikoht; välisriigis sündinu puhul Eestisse elama asumise aasta; kodakondsus, rahvus, emakeel, teiste keelte oskus (vastamine vabatahtlik). 10-aastastelt ja vanematelt isikutelt koguti andmeid üldhariduse ja kõrgeima lõpetatud kutse- või erihariduse kohta ning 3-aastaste ja vanemate puhul õppimise kohta. Küsimused seadusliku perekonnaseisu, naistel sünnitatud laste arvu ning esimese lapse sünniaasta kohta esitati 15-aastastele ja vanematele isikutele.

Loenduslehel olid küsimused ka isiku elatusallikate (võimalik oli näidata 12 viimase kuu kaht olulisemat elatusallikat), 15-aastaste ja vanemate sotsiaalse staatuse, tööhõive, põhitöökoha või põhitööandja nime (vastamine vabatahtlik), töötamise koha aadressi, põhitöökoha (tööandja) põhitegevusala, isiku ameti ja tööalase staatuse ning tema hariliku tööandala pikkuse kohta.

Küsimusele, mis käsitles isiku suhtumist religiooni ja kindlat usku tunnistava isiku usuliiki, oli vastamine vabatahtlik.

Küsimus pikaajalise haiguse ja puude kohta aitab välja selgitada puudega isikute arvu ning nende vajadust kõrvalabi järele. Niisugune info on abiks sotsiaalse kaitse valdkonnas töötajatele.

Küsimuste ja ettenähtud vastusevariantide põhjal koostati loenduse tulemuste väljundtabelite vormid (176), mille on kinnitanud rahandusminister (RTL, 1999, 158, 2237). Väljundtabeleid, võttes arvesse kõiki kavandatud jaotusi, on ligikaudu 42 000.

Rahvaloenduse tulemused avaldatakse temaatiliste kogumikena (ka disketil) ja Statistikaameti veebilehel www.stat.ee rubriigis "Statistika" ning hiljem CD-ROM-il.

Temaatilistes kogumikes võrreldakse 2000. aasta rahvaloenduse tulemusi 1989. aasta loenduse tulemustega. Peale tabelite on nendes ka teemakaarte ja diagramme, lühiülevaateid ning on selgitatud kasutatud mõisteid. Kogumikud kannavad üldist pealkirja "2000. aasta rahva ja eluruumide loendus" ning sisaldavad järgmisi teemasid:

- faktiline ja alaline rahvastik, rahvastiku paiknemine, soo- ja vanuskoosseis;
- kodakondsus, rahvus, emakeel ja võõrkeelte valdamine;
- haridus ja õppimine;
- sünnikoht ja ränne;
- perekonnaseis ja sündimus;
- leibkonnad ja perekonnad;
- usk ja tervis;
- elatusallikad, tööalane ja sotsiaalmajanduslik staatus;
- majanduslikult aktiivne rahvastik;
- rahvastiku ja leibkondade elamistingimused;
- eluruumid ja eluruume sisaldavad hooned.

Temaatilised kogumikud ilmuvad 2003. aasta lõpuks. Elektroonselt on põhilised loendus- tulemused kättesaadavad 2002. aasta jooksul.

Rahvaarvu muutus ajavahemikul 1989–2000

Rahvusvaheliselt peetakse rahvastikuarvestust ainult alalise rahvastiku järgi, faktilise (kohaloleva) rahvastiku fikseerimine sõltub riigist ja see definitsioon on üldiselt määratletud riigikeskselt. Eestis nõukogude perioodil korraldatud rahvaloendustel toodi rahvaarv välja nii faktilise kui ka alalise rahvastiku kohta. Faktilise rahvastiku fikseerimine oli eelkõige tingitud sellest, et kuni 1979. aastani peeti rahvastikuarvestust Nõukogude Liidus faktilise rahvastiku järgi ning see tingis ka vajaduse fikseerida 1989. aasta rahvaloendusel faktiline rahvastik, kuigi rahvastiku arvepidamine põhines juba alalisel rahvastikul.

2000. aasta rahvaloendusel fikseeriti faktiline rahvastik eelkõige seetõttu, et tagada ühelt poolt võrreldavus viimase (1989. aasta) loendusega ning teisalt saada informatsiooni ka antud hetkel Eestis kohaloleva rahvastiku kohta.

Vastavalt rahva ja eluruumide loenduse seadusele (§6), loeti isikuid faktilise rahvastikuna asukoha järgi loendusmomendil ja alalise rahvastikuna isiku alalise elukoha järgi.

2000. aasta rahvaloenduse andmetel on faktilise rahvastiku koguarv 1 356 931 ja alalise rahvastiku koguarv 1 370 052, neist 17 797 isikut viibis ajutiselt (alla 1 aasta) välisriikides. Eestis ajutiselt viibivaid välisriikide elanikke loendati 4676. Seetõttu on Eesti faktilise rahvastiku arv loendusel 13 121 inimese võrra alalise rahvastiku arvust väiksem. Varasematel rahvaloendustel oli vastupidi — faktilist rahvastikku oli alalisest rohkem. 1989. aasta rahvaloenduse järgi oli faktilist rahvastikku alalisest 7254 võrra rohkem.

Võrreldes Statistikaameti publitseeritud esialgsete loendustulemustega, on rahvaarvu täpsustatud: lõplik rahvaarv on alalise rahvastiku puhul 6691 ja faktilise rahvastiku puhul 13 535 inimese võrra väiksem. Erinevuse põhjused on peamiselt topeltloendatud isikud, kes tuvastati andmebaasis isikuandmete võrdlemisel, loendamisel tehtud vead ning loendajate aruannetes tehtud vead.

Võrreldes 1989. aasta rahvaloenduse tulemustega, vähenes Eesti faktiline rahvastik 215 985 inimese ehk 13,7% võrra ja alaline rahvastik 195 610 inimese ehk 12,5% võrra (tabel 4 ja teemakaart 4). Alaline rahvastik vähenes peamiselt linnades, kus rahvaarv vähenes 167 647 inimese ehk 15,4% võrra, sealhulgas

- Tallinnas 16,4%,
- Kohtla-Järvel 23,2%,
- Narvas 15,4%,
- Tartus 10,8% ja
- Pärnus 13,1%.

Teistest suurematest linnadest vähenes alaliste elanike arv kõige enam Paldiskis (44,8%), järgnesid Tapa (35,2%), Kiviõli (28,7%), Jõhvi (22,4%) ja Valga (19,2%). Väikelinnadest vähenes alaliste elanike arv kõige enam Püssis (26,1%), järgnesid Kunda (22,6%), Kehra (20,5%), Narva-Jõesuu (20,5%), Võhma (20,1%) ja Loksa (19,0%). Loendustevahelisel perioodil suurenes alaliste elanike arv linnadest vaid Saue (12,8%) ja Maardus (4,3%).

Alaline rahvastik suurenes 41 ja vähenes 164 vallas. Oluliselt suurenes rahvaarv Viimsi (52,1%), Kiili (40,0%), Saku (25,3%) ja Kernu (24,6%) vallas Harjumaal, Alajõe vallas Ida-Virumaal (42,3%) ning Sauga vallas Pärnumaal (25,6%).

Valdade alaliste elanike arv vähenes protsentuaalselt kõige rohkem Ida-Virumaal (12,9%), järgnesid Järvamaa (12,6%), Läänemaa (11,6%), Viljandimaa (11,2%) ja Jõgevamaa (10,6%).

Suhteliselt kõige enam vähenes valdade rahvastik võrreldes Eesti keskmisega (5,9%)

- Harjumaal — Vasalemma (39,7%), Loksa (34,2%) ja Keila (21,5%) vallas;
- Ida-Virumaal — Sonda (33,4%) ja Aseri (24,2%) vallas;
- Järvamaal — Kabala (22,5%), Järva-Jaani (21,6%), Kareda (20,1%) ning Lehtse (19,3%) vallas;
- Läänemaal — Vormsi (25,3%), Martna (20,7%), Kullamaa (20,5%) ja Hanila (20,4%) vallas;
- Lääne-Virumaal — Tamsalu vallas (22,8%);
- Pärnumaal — Saarde (21,5%) ja Tootsi (20,0%) vallas;
- Raplamaal — Vigala vallas (23,3%);
- Saaremaal — Kihelkonna (26,4%), Mustjala (25,5%) ja Kärla (20,2%) vallas;
- Valgemaal — Öru (20,5%) ja Karula (18,9%) vallas;
- Võrumaal — Meremäe (21,9%) ja Mõniste (18,6%) vallas.

Rahvaarv on suhteliselt enam vähenenud eemal suurematest linnadest, hõredama asustatusega maakondade äärealade valdades (tabel 4). Rahvastiku asustustihedust valdades näitab teemakaart 3. Valdade rahvastik on enamjaolt koondunud suuremate linnade ja teiste maakonnakeskuste ümbrusesse, kus on paremad majanduslikud ja sotsiaalsed tingimused.

Varasemad rahvaloendused näitasid alalise rahvastiku juurdekasvu. See oli tingitud eelkõige sisserändest. 2000. aasta rahvaloenduse järgi on rahvaarv märgatavalt vähenenud, mille põhjustasid nii väljaränne kui ka negatiivne loomulik iive. Negatiivse iibe tõttu vähenes rahvaarv loendustevahelisel ajal 42 074 võrra. Registreeritud

välisrände tulemusena vähenes rahvaarv 85 496 võrra, mis on vaid osa tegelikust negatiivsest välisrände saldost, sest Eestis ei ole elukoha muutuse registreerimise kohustust. Rändeandmetes ei kajastu kaadrisõjaväelaste, ajateenijate ja vangide ränne endises Nõukogude Liidus ja hiljem Eestist Venemaale, sest seda arvestati erirändena, kajastamata rände lähte- ja sihtkohta.

Rahvaarv on pärast 1989. aastat vähenenud ka seetõttu, et Eesti eraldus endise Nõukogude Liidu majandussüsteemist ning üleminek turumajandusele vähendas oluliselt töökohtade arvu. Tööpuudus on kindlasti olnud väljarände põhjusi, mida näitab ka asjaolu, et kõrgema töötuse määraga piirkondades on rahvaarv vähenenud suhteliselt rohkem.

1989. aasta rahvaloenduse andmetel põhineva jooksva rahvastikuarvestuse (sündide, surmade ja registreeritud rände) andmete alusel oli 2000. aasta 1. jaanuari seisuga alalise rahvastiku arv 1 439 197 (669 583 meest ja 769 614 naist). 2000. aasta rahvaloenduse andmetel on 2000. aasta 1. jaanuari seisule arvestatud rahvaarv 1 371 835 (632 645 meest ja 739 190 naist). Erinevus (67 362 inimest — 36 938 meest ja 30 424 naist) on ühelt poolt tingitud välisrände puudulikust arvestusest loendustevahelisel ajal ning endise Nõukogude Liidu sõjaväelaste lahkumisest, kes olid 1989. aasta loendusel arvatud oma elu- ja töökoha alusel Eesti alalise rahvastiku hulka. Rahvastikuarvestuses on esinenud ka ebatäpsusi: ajavahemikus 1991–1999 on rahvaarvust maha arvamata 2339 surnut, kelle vanus või elukoht Eestis oli teadmata. Teisalt on jooksva arvestuse rahvaarvu ja loenduse rahvaarvu vahe tingitud loenduse alakaetusest. Loenduse alakaetuse üheks põhjuseks on asjaolu, et 2000. aasta rahvaloendusel ei õnnestunud loendada kõiki Eestist ajutiselt äraolevaid isikuid, kui nende eluruumis polnud teisi leibkonnaliikmeid, kes oleks

nende kohta andmeid andnud. Alakaetuse põhjuseks on ka nn kaudne keeldumine, kui inimene ei soovi anda informatsiooni enese kohta ning käitub nii, et temaga pole võimalik kontakteeruda ega tema eluruumi sisse saada.

Täpsema ülevaate nii loendustevahelise aja tegelikest rahvastikuprotsessidest kui ka 2000. aasta rahvaloenduse täpsusest saab pärast asjakohaseid meetodilisi töid ja uurimusi, mis võimaldavad anda adekvaatse ülevaate ühiskonnas toimunud.

Muutused rahvastiku soo- ja vanusjaotuses

Rahvaloenduste andmetel on Eestis alati olnud naisi rohkem kui mehi, eriti vanemaealises rahvastikus. Võrreldes 1989. aasta rahvaloendusega naiste osatähtsus kasvas. 1989. aastal oli mehi 46,7% ja naisi 53,3%, 2000. aastal oli mehi 46,1% ja naisi 53,9%. Meeste arvu 1000 naise kohta haldusüksuste järgi näitab tabel 3 ja selle alusel koostatud teemakaart 6.

Rahvastiku vanusjaotus on loendustevahelisel ajal muutunud (tabel 18, teemakaart 7, 8, 9). Oluliselt vähenes kuni 14-aastaste laste arv, samuti 15–64-aastaste arv. Suurenes 65-aastaste ja vanemate elanike arv ning osatähtsus rahvastikus. Laste arvu vähenemist on põhjustanud peamiselt väiksem sündide arv. Kui ajavahemikul 1980–1989 sündis 238 832 last, siis 1990.–1999. aastal 153 273 ehk 85 559 vähem. 15–64-aastaste vähenenud arvu tingis peamiselt väljaränne. Vanemaealiste (65-aastased ja vanemad) elanike osatähtsus suurenes sellesse ikka jõudnud elanike arvu hüppelise suurenemise tõttu aastatel 1989–1999.

Rahvastiku vanuskoosseisu muutused
 (2000. ja 1989. aasta loendustulemuste võrdlus)

Kokku	-195 610	-167 647	-27 963	-12.5	-15.4	-5.9

Kogurahvastiku vähenemisest langeb 49,3% kuni 9-aastaste laste arvele. Suuresti on vähenenud 25-39-aastaste ja 50-59-aastaste elanike arv. Kogu rahvaarvu vähenemisest langeb 85,7% linnade rahvastiku vähenemise arvele.

Muudatused Eesti haldusjaotuses ja asustuses pärast 1989. aasta rahvaloendust

Pärast 1989. aasta rahvaloendust on Eesti halduskorralduses ja asustuses toimunud olulised muutused, mida kajastavad käesoleva kogumiku tabelid 9-11.

Halduslikult jaguneb Eesti territoorium maakondadeks ning maakonnad omakorda valdadeks ja linnadeks (teemakaart 1 ja 2). Tallinn on jaotatud 8 linnaosaks. Asustusjaotuse järgi jaguneb vald asulateks, milleks on külad, alevikud, alevid ja vallasisesed linnad. Linn haldusüksusena on samades piirides ka asula.

1989. aasta rahvaloenduse ajal oli Eestis 6 vabariiklikku linnahaldust, 4 linnarajooni ja 15 maarajooni, 33 linna, 23 alevit ja 191 küla-nõukogu, viimastes 3436 maa-asulat (küla, alevikku).

2000. aasta rahvaloenduse ajal jagunes Eesti territoorium 15 maakonna vahel, omavalitsuslikke linnu oli 42 ja valdu 205, valdades oli 4610 asulat, neist 5 linna, 9 alevit, 172 alevikku ja 4424 küla.

Võttes arvesse loendustevahelise aja muutusi haldusüksuste nimedes, liikides, koosseisus ja piirides, on 1989. aasta loendustulemused käesolevas kogumikus võrreldavuse huvides ümber arvestatud 2000. aasta haldusüksuste koosseisule ja piiridele.

Seadusandlikult on Eesti riigi haldusjaotus määratletud alljärgnevalt:

- Eesti maa-ala haldusjaotuse korralduse aluseks on Eesti territooriumi haldusjaotuse seadus (RT I 1995, 29, 356; 1996, 42, 808; 1999, 93, 833);
- Haldusüksuste nimistu maakondade ning neisse kuuluvate valdade ja linnade järgi on kinnitatud Vabariigi Valitsuse 3. aprilli 1995. a määrusega nr 159, milles on tehtud hiljem muudatusi ja täiendusi (RT I 1995, 40, 567; 53,855; 1996, 55, 997; 76, 1346; 1997, 74, 1236; 1998, 56, 842; 96, 1516; 1999, 31, 427; 45, 522; 52, 564; 52, 568; 53, 579; 57, 606; 64, 643);

- Vallasisest linnade, alevite, alevike ja külade nimistu on kinnitatud Vabariigi Valitsuse 18. detsembri 1997. a määrusega nr 244 (RT I 1997, 95/96, 1577; 99, 1604; 1998, 56, 842; 60, 955; 96, 1516; 112, 1853; 1999, 22, 345; 31, 427; 45, 522; 52, 564; 52, 568; 53, 579; 57, 606).

Haldusjaotuse (sh nimede) muudatused pärast 1989. aasta rahvaloendust

1. Maarajoonid nimetati maakondadeks, kusjuures 5 maakonda sai uue nime (Ida-Viru, Lääne, Lääne-Viru, Järva ja Saare).
2. Likvideeriti vabariiklikud linnahaldused ning neisse kuulunud linnad ja alevid arvati maakondade koosseisu.
3. Kohtla-Järve linnast eraldati Kohtla-Nõmme alev ja Jõhvi linn. Viivikonna alev likvideeriti omavalitsusüksusena ja arvati Kohtla-Järve linna koosseisu.
4. Eestis loodi kaheastmeline haldusstruktuur. Esmase haldustasandi moodustavad omavalitsuslikud vallad ja linnad, teisese tasandi maakonnad. Osale alevitele omistati omavalitsusliku linna staatus (Abja-Paluoja, Karksi-Nuia, Kehra, Lihula, Loksa, Narva-Jõesuu, Põlva, Püssi, Rapla, Räpina, Saue, Tamsalu ja

Võhma), osale aga valla staatus (Aegviidu, Järvakandi, Kohila, Kohtla-Nõmme, Lavassaare, Märjamaa, Pärnu-Jaagupi, Tootsi, Võsu ja Vändra). Hiljem arvati Abja-Paluoja linn vallasisese linnana Abja valda, Karksi-Nuia linn Karksi valda, Lihula linn Lihula valda, Antsla linn Antsla valda, Otepää linn Otepää valda. Pärnu-Jaagupi alev-vald kaotati ning alev arvati Halinga valla asulaks. Ka Võsu vald kaotati ning Võsu alev jaotati Võsu alevikuks ja Käsmu külaks, mis arvati Vihula valda.

5. Moodustati 6 uut valda:
Kaiu vald eraldus Juuru vallast;
Kernu vald eraldus Nissi vallast;
Kiili vald eraldus Saku vallast;
Orissaare vald eraldus Põide vallast;
Saksi vald eraldus Kadrina vallast;
Torgu vald eraldus Salme vallast;
6. Muudeti Meremäe ja Vastseliina valla vahelist piiri. Vastseliina valda anti Meremäe vallast 14 küla. Muutus ka Halliste ja Karksi valla vaheline piir, kusjuures Karksi valda anti Halliste vallast üle 1 küla (Muri küla).
7. Muudeti 20 külanõukogu või valla nime.
8. Tallinna 4 linnarajooni asemel moodustati 8 linnaosa.

CHANGES OF POPULATION NUMBER AND ADMINISTRATIVE DIVISION IN THE PERIOD 1989–2000

Introduction

The Population and Housing Census was conducted as at 31 March 2000 pursuant to the following two legal acts:

- “Population and Housing Census Act” passed in the Riigikogu on 13 May 1998 (RT I 1998, 52/53, 772; 1999, 101, 901);
- the questionnaire of the 2000 Population and Housing Census (hereinafter Population Census), forms of questionnaires and Census rules which were confirmed by the Government of the Republic Regulation No 82 of 5 March 1999 (RT I, 1999, 32,431).

The Census questionnaire consisted of two questionnaires — “Housing Questionnaire” and “Personal Questionnaire” which included 12 questions on the dwelling and household and 31 questions on the person. A short overview on the data received from the questionnaires has been given below.

Housing questionnaire contained the address of dwelling, list of inhabitants of dwelling by households, relations of members of household with the reference person, legal spouses and partners in consensual union, relations between children and parents; the temporary absence (for up to one year) of the member of household from the permanent place of residence, duration of absence in months was recorded. In the case of persons temporarily living in the dwelling the duration of temporary presence was recorded. The answers given to the questions of Housing Questionnaire included information about the type, occupancy, ownership of dwelling, basis for use, area of dwelling, number of rooms, existence of kitchen and types of facilities; type and time of construction of the building containing dwellings. In the case of institutional household its type was recorded. In the case of private household the using of land for growing field crops or horticultural products, natural grassland, woodland or farm animals was recorded.

The answers given to the questions of Personal Questionnaire contained the following information: sex, date of birth and permanent place of residence of the person questioned; the location of the person at the moment of Census, the permanent place of residence at the last Census (on 12 January 1989), the birthplace of the person questioned and his/her parents; in the case of person who was born abroad, the year of his/her arrival in Estonia; the citizenship, ethnic nationality, mother tongue, command of other languages (answering voluntary), in the case of 10-year-old and older persons the general education and highest level of vocational or professional education completed, in the case of 3-year-old and older persons the attendance of any educational institutions. The questions on legal marital status, in the case of females about number of children they have given birth to and the year of birth of their first child were asked from 15-year-old and older persons. The questionnaire also included questions on sources of subsistence (possible to indicate two most relevant sources of subsistence in the last 12 months), for 15-year-old and older persons questions on social status, employment, the name of the main place of work or the name of main employer (answering voluntary), the address of the place of work, the main economic activity of main place of work (main employer), the person's occupation and employment status and the length of usual working week.

Answering the question about a person's religious affiliation and about the faith of a person who confesses particular faith was voluntary.

The question on long-term illness and disability enables to determine groups of population who need assistance in taking care of themselves or moving around outside home. This information serves to help people working in the field of social protection.

On the basis of questions and prescribed variants of answers, output tables (form 176) of Census results were compiled which were confirmed by the Minister of Finance (RTL, 1999, 158, 2237). The total number of output tables, taking into account all planned divisions, amounts to about 42,000.

Census results will be published as thematic publications (also on the diskette) and on the web site of the Statistical Office at the address www.stat.ee under the heading "Statistics" and later on the CD-ROM.

In thematic publications the results of the 2000 Population Census are compared with the data of the 1989 Population Census. In addition to tables the publications also include thematic maps and diagrams, short overviews and explanations of terms used. The publications are published under the uniform heading "2000. aasta rahva ja

eluruumide loendus. The 2000 Population and Housing Census" and include the following topics:

- Population de facto and Usual Resident Population, Location of the Population, Population Sex and Age Structure
- Citizenship, Ethnic Nationality, Mother Tongue and Command of Foreign Languages
- Education Completed and Studies
- Place of Birth and Migration
- Marital Status and Fertility
- Households and Families
- Religion and Health
- Sources of Subsistence, Employment and Socio-economic Status
- Economically Active Population
- Living Conditions of Population and Households
- Dwellings and Buildings Containing Dwellings

Thematic publications will be published by the end of 2003. Electronically the main Census results will be available within the year of 2002.

Change of population number in 1989–2000

Internationally accounts are kept only by usual resident population, fixing population de facto depends on the country and this definition is specified as state-centred. In Estonia during the Population Censuses conducted at the Soviet period two population numbers were given: population de facto and usual resident population. Fixing population de facto resulted from the fact that in the Soviet Union until 1979 population was recorded according to population de facto and this caused the need to fix population de facto also in the 1989 Census, although population accounting was based on usual resident population already.

During the 2000 Population Census population de facto was fixed in order to guarantee comparability with the last Census (1989) on the one hand and to get information on the population in Estonia at the moment of Census on the other hand.

Pursuant to the Population and Housing Census Act (§6) persons were enumerated as population de facto according to their place of residence at the moment of Census and as usual resident population according to their permanent place of residence.

According to the 2000 Population Census data population de facto totalled 1,356,931 persons and usual resident population 1,370,052 persons, of which 17,797 were temporarily (for up to one year) in foreign countries. Residents of foreign countries being temporarily in Estonia numbered 4,676. Consequently in the Census the number of

population de facto is by 13,121 persons smaller than that of usual resident population.

In the previous Censuses the situation was the opposite — population de facto exceeded usual resident population. According to the 1989 Population Census population de facto was by 7,254 persons bigger than usual resident population.

Compared to the preliminary Census data published by the Statistical Office of Estonia the number of population has been adjusted: in the case of usual resident population the final population number is by 6,691 persons and in the case of population de facto it is by 13,535 persons smaller. The main reasons for the difference are double-enumerated persons who were discovered comparing personal data in the database, errors made in enumeration and errors in the enumerators' reports.

Compared with the results of the 1989 Population Census, population de facto of Estonia has decreased by 215,985 persons or 13.7% and usual resident population by 195,610 persons or 12.5% (see table 4 and thematic map 4). Usual resident population decreased mainly in cities where population number decreased by 167,647 persons or 15.4%, of which

- in Tallinn by 16.4%,
- in Kohtla-Järve by 23.2%,
- in Narva by 15.4%,
- in Tartu by 10.8% and
- in Pärnu by 13.1%.

Of other bigger cities usual resident population decreased most in Paldiski (44.8%), followed by Tapa (35.2%), Kiviõli (28.7%), Jõhvi (22.4%) and Valga (19.2%). Of small cities usual resident population decreased most in Püssi (26.1%), followed by Kunda (22.6%), Kehra (20.5%), Narva-Jõesuu (20.5%), Võhma (20.1%) and Lokska (19.0). In the period between Censuses the number of usual resident population has grown in Saue (12.8%) and Maardu (4.3%) city.

The usual resident population has increased in 41 rural municipalities and decreased in 164 rural municipalities. The population has significantly increased in Viimsi (52.1%), Kiili (40.0%), Saku (25.3%) and Kernu (24.6%) rural municipality in Harju county, in Alajõe rural municipality in Ida-Viru county (42.3%) and in Sauga rural municipality in Pärnu county (25.6%).

In percentages the usual resident population of rural municipalities has decreased most in Ida-Viru (12.9%), followed by Järva (12.6%), Lääne (11.6%), Viljandi (11.2%), and Jõgeva (10.6%) counties.

The population of rural municipalities has decreased most in comparison with the average of Estonia (5.9%) in:

- Harju county — Vasalemma (39.7%), Lokska (34.2%) and Keila (21.5%) rural municipality;
- Ida-Viru county — Sonda (33.4%) and Aseri (24.2%) rural municipality;
- Järva county — Kabala (22.5%); Järva-Jaani (21.6%), Kareda (20.1%) and Lehtse (19.3%) rural municipality;
- Lääne county — Vormsi (25.3%), Martna (20.7%), Kullamaa (20.5%) and Hanila (20.4%) rural municipality;
- Lääne-Viru county — Tamsalu (22.8%) rural municipality;
- Pärnu county — Saarde (21.5%) and Tootsi (20.0%) rural municipality;
- Rapla county — Vigala (23.3%) rural municipality;
- Saare county — Kihelkonna (26.4%), Mustjala (25.5%) and Kärla (20.2%) rural municipality;
- Valga county — Öru (20.5%) and Karula (18.9%) rural municipality;
- Võru county — Meremäe (21.9%) and Mõniste (18.6%) rural municipality.

The population has decreased relatively more far from larger cities, in rural municipalities at the border in thinly populated counties (table 4). The population density in rural municipalities can be seen on thematic map 3. The population of rural municipalities has aggregated around larger cities and county centres where the economic and social conditions are better.

Previous Population Censuses indicated the increase of usual resident population. This was mainly caused by immigration. According to the 2000 Population Census the population has decreased significantly as a result of emigration and negative natural increase. On account of negative natural increase the population decreased by 42,074 persons in the period between Censuses. As a result of registered emigration the population has decreased by 85,496 persons which is only a part of the actual negative net emigration, as residents of Estonia do not have to register their place of residence. Migration data do not include migration of regular officers, conscripts and prisoners in the former Soviet Union and later from Estonia to Russia as it was considered special migration, without indicating places of departure and destination.

Decrease of population after the 1989 Population Census has been caused by separation of Estonia from the economic system of the former Soviet Union and transition to market economy has significantly decreased the number of workplaces. Unemployment has certainly been one reason for

emigration which is also indicated by the fact that in the areas with higher unemployment rate the decrease of population has been relatively bigger.

According to the 1989 Population Census data based on current accounts (births, deaths, registered migration) the usual resident population as at 1 January 2000 numbered 1,439,197 persons (669,583 males and 796,614 females). According to the 2000 Population Census data the population as at 1 January 2000 is 1,371,835 persons (632,645 males and 739,190 females). The discrepancy (67,362 persons — 36,938 males and 30,424 females) has been caused by insufficient accounting of emigration during the period between Censuses and by departure of the soldiers of the former Soviet Union. In the 1989 Population Census they were according to their place of residence and work included in the usual resident population of Estonia. Some inaccuracies have been occurred in population accounting: in 1991–1999 2,339 dead persons whose age or place of residence in Estonia was unknown were not deducted from the population. On the other hand, the discrepancy between population of current accounting and population according to Census data has been caused by undercoverage of the Census. One reason for the undercoverage is that in the 2000 Population Census not all the persons who were temporarily away from Estonia were enumerated if there were no other members of household who would have given data about them. Another reason for undercoverage is also the so-called indirect refusal, when a person is unwilling to give information on himself/herself and it is impossible to contact the person or to enter his/her dwelling.

More exact overview of the processes during the period between Censuses as well as of the accuracy of the 2000 Population Census will be given after methodological works and surveys have been carried out.

Changes in population sex and age structure

According to the data of Population Censuses conducted in Estonia the number of females has always been bigger than that of males, especially as regards the old-age population. Compared with the 1989 Population Census the proportion of females in the population still increased. In 1989 males accounted for 46.7% and females for 53.3%, in 2000 males accounted for 46.1% and females for 53.9% of the total population. The number of males per 1,000 females by administrative units is shown in table 3 and thematic map 6.

Age distribution of population has changed during the period between Censuses (see table 18, thematic maps 7, 8, 9). The number of children aged 0–14 has considerably decreased, as well as the number of persons aged 15–64. The number and percentage of persons aged 65 and older has increased. Decrease in the number of children has been caused by the decrease of births. If in the period 1980–1989 238,832 children were born, then during 1990–1999 the respective figure was 153,273 (85,559 children less). The decrease of population of the persons aged 15–64 was mainly caused by emigration. The percentage of persons aged 65 and older has increased due to the abrupt increase of number of persons reaching this age-group in the period 1989–1999.

Changes in population age structure
 (comparison of the 2000 Census and 1989 Census results)

Age group	Decrease (-) or increase (+) of population			Decrease (-) or increase (+) in percentages		
	total	cities	rural municipalities	total	cities	rural municipalities
0–4	-60 367	-42 458	-17 909	-47.1	-52.1	-44.5

70–74	+19 710	+15 559	+4 151	+47.9	+59.9	+27.3
75–79	-1 485	+1 170	-2 655	-3.7	+4.9	-16.1
80–84	-6 262	-2 776	-3 486	-25.6	-19.6	-33.9
85–89	+1 830	+1 140	+690	+16.8	+17.7	+15.5
90–94	+1 254	+678	+576	+44.7	+39.9	+52.0
95–99	+130	+82	+48	+24.4	+25.3	+23.0
100 and older	-2	+1	-3	-2.9	+2.4	-10.7
Age unknown	+441	+365	+76	-	-	-
Total	-195 610	-167 647	-27 963	-12.5	-15.4	-5.9

Children aged 0–9 account for 49.3% of the decrease of total population. The number of persons aged 25–39 and 50–59 has decreased considerably. The decrease of the population of cities accounts for 85.7% of the decrease of total population.

Changes in administrative division of Estonia after the 1989 Population Census

After the 1989 Population Census great changes have occurred in Estonia's administrative structure which are reflected in the tables 9–11 of the present publication.

The territory of Estonia is divided into counties and counties into rural municipalities and cities (thematic map 1 and 2). Tallinn has been divided into 8 city districts. Rural municipalities are divided into settlements (villages, small towns, towns and cities without municipal status). City as administrative unit is also a settlement within the same borders.

During the 1989 Population Census Estonia contained 6 republican city administrations, 4 city districts and 15 rural districts, 33 cities, 23 towns and 191 village councils, the latter

included 3,436 rural settlements (villages, small towns).

During the 2000 Population Census the territory of Estonia was divided between 15 counties, city municipalities numbered 42 and rural municipalities — 205; rural municipalities included 4,610 settlements, of which 5 cities, 9 towns, 172 small towns and 4,424 villages.

Taking into consideration the changes of names, types and borders of administrative units, the 1989 Census results have been recalculated for comparability of data according to the distribution and borders of administrative units in 2000.

The administrative division of Estonia has been legally specified by the following regulations:

- the administrative-territorial organisation of Estonia is based on the Territory of Estonia Administrative Division Act (RT I 1995, 29, 356; 1996, 42, 808; 1999, 93, 833);
- the list of administrative units by counties, rural municipalities and cities within them is confirmed by the Government of the Republic Regulation No 159 of 3 April 1995 which has later been amended and complemented (RT I 1995, 40, 567; 53, 855; 1996, 55, 997; 76, 1346; 1997, 74, 1236; 1998, 56, 842; 96,

1516; 1999, 31, 427, 45, 522; 52, 564; 52, 568; 53, 579; 57, 606; 64, 643);

- the list of cities without municipal status, towns, small towns and villages is confirmed by the Government of the Republic Regulation No 244 of 18 December 1997 (RT I 1997, 95/96, 1577; 99, 1604; 1998, 56, 842; 60, 955; 96, 1516; 112, 1853; 1999, 22, 345; 31, 427; 45, 522; 52, 564; 52, 568; 53, 579, 57, 606).

Administrative-territorial alterations (alterations of names) after the 1989 Population Census:

1. Rural districts were re-named counties, 5 counties got a new name (Ida-Viru, Lääne, Lääne-Viru, Järva and Saare county).
2. Republican city administrations were liquidated and cities and towns belonging to them were included in counties.
3. Kohtla-Nõmme town and Jõhvi city were separated from Kohtla-Järve city. Viivikonna town as local government was liquidated and included in Kohtla-Järve city.
4. In Estonia two-stage administrative structure was established. The primary administrative level comprise local government rural municipalities and cities, the secondary level consists of counties. Some of the towns were given the status of city municipality (Abja-Paluoja, Karksi-Nuia, Kehra, Lihula, Loksa, Narva-Jõesuu, Põlva, Püssi, Rapla, Röpina, Saue, Tamsalu and Võhma), some were given the status of rural municipality (Aegviidu, Järvakandi, Kohila, Kohtla-Nõmme, Lavassaare, Märjamaa, Pärnu-Jaagupi, Tootsi, Võsu and Väandra). Later Abja-Paluoja city as city without municipal status was included in Abja rural municipality, Karksi-

Nuia city — in Karksi rural municipality, Lihula city — in Lihula rural municipality, Antsla city — in Antsla rural municipality, Otepää city — in Otepää rural municipality. Pärnu-Jaagupi rural municipality was liquidated and Pärnu-Jaagupi town was included in Halinga rural municipality. Võsu rural municipality was also liquidated and Võsu town was divided into Võsu small town and Käsmu village which were included in Vihula rural municipality.

5. 6 new rural municipalities were established: Kaiu rural municipality separated from Juuru rural municipality; Kernu rural municipality separated from Nissi rural municipality; Kiili rural municipality separated from Saku rural municipality; Orissaare rural municipality separated from Põide rural municipality; Saksi rural municipality separated from Kadrina rural municipality; Torgu rural municipality separated from Salme rural municipality.
6. The borderline between Meremäe ja Vastseliina rural municipality was altered. 14 villages from Meremäe rural municipality were given to Vastseliina rural municipality. The borderline between Halliste and Karksi rural municipality also changed, one village (Muri village) was given from Halliste rural municipality to Karksi rural municipality.
7. The names of 20 village councils or rural municipalities were altered.
8. Instead of 4 regions of Tallinn 8 city districts were established.

Teemakaardid

Teemakaart 1. Eesti maakonnad ja linnad, 2000

Eesti haldusjaotuse kaart maakondade (15) nimede, piiride ja pindaladega ning linnade (42) nimedega. Kaardil on tähistamata vallasisesed linnad (Läänemaal — Lihula; Valgemaal — Otepää; Viljandimaal — Abja-Paluoja ja Karksi-Nuia; Võrumaal — Antsla).

Aluseks on **Tabel 2**. Haldusüksuste faktiline ja alaline rahvastik soo järgi, 1989, 2000.

Teemakaart 2. Eesti vallad, 2000

Eesti haldusjaotuse kaart maakondade piiride ning valdade (205) nimede ja piiridega. Kaardil on tähistamata nende alev-valdade nimed, mis langevad kokku vallanimedega (Pärnumaal — Väandra alev-vald; Raplamaal — Kohila alev-vald ja Märjamaa alev-vald).

Aluseks on **Tabel 2**. Haldusüksuste faktiline ja alaline rahvastik soo järgi, 1989, 2000.

Teemakaart 3. Rahvastiku asustustihedus valdades (elanikku km² kohta), 2000

Valdade alalise rahvastiku asustustihedus 1 km² kohta tihedusastmete vahemike järgi. Eesti keskmine asustustihedus on 30,3 elanikku km² kohta. Eraldi on esitatud asustustihedus ka väikesel maakondade kaardil.

Aluseks on **Tabel 2**. Haldusüksuste faktiline ja alaline rahvastik soo järgi, 1989, 2000.

Teemakaart 4. Rahvaarvu muutumine valdades, 1989–2000

Valdade alalise rahvastiku vähenemine (roheline) ja suurenemine (kollane) protsentide vahemike järgi 2000. aastal võrreldes 1989. aasta loenduse tulemustega. Eesti keskmine on 87,5%.

Aluseks on **Tabel 4**. Haldusüksuste faktilise ja alalise rahvaarvu muutumine, 1989–2000.

Teemakaart 5. Linnade ja valdade rahvastiku osatähtsus maakondades, 2000

Linnade ja valdade alalise rahvastiku osatähtsus on esitatud maakondade kaardil sektordiagrammina. Eesti keskmine on 67,4% (linnade rahvastik).

Aluseks on **Tabel 2**. Haldusüksuste faktiline ja alaline rahvastik soo järgi, 1989, 2000.

Teemakaart 6. Mehi 1000 naise kohta haldusüksustes, 2000

Valdade ja linnade meeste arv 1000 naise kohta arvu vahemike järgi. Meeste ülekaalu näitab sinine ja naiste ülekaalu roosa värvitoon. Eesti keskmine on 856. Eraldi on esitatud sama näitaja ka väikesel maakondade kaardil.

Aluseks on **Tabel 3**. Meeste ja naiste osatähtsus haldusüksuste rahvastikus, 1989, 2000.

Teemakaart 7. 0–14-aastaste elanike osatähtsus haldusüksustes, 2000

Laste osatähtsus linnade ja valdade alalises rahvastikus protsendivahemike järgi. Eesti keskmine on 18,1%. Eraldi on esitatud sama näitaja väikesel maakondade kaardil.

Aluseks on **Tabel 15**. Rahvastik alalise elukoha ja vanuse järgi, 2000.

Teemakaart 8. 15–64-aastaste elanike osatähtsus haldusüksustes, 2000

Noorte ja tööealiste osatähtsus linnade ja valdade alalises rahvastikus protsendivahemike järgi. Eesti keskmine on 66,9%. Eraldi on esitatud sama näitaja väikesel maakondade kaardil.

Aluseks on **Tabel 15**. Rahvastik alalise elukoha ja vanuse järgi, 2000.

Teemakaart 9. 65-aastaste ja vanemate elanike osatähtsus haldusüksustes, 2000

Pensioniealiste osatähtsus linnade ja valdade alalises rahvastikus protsendivahemike järgi. Eesti keskmine on 15,0%. Eraldi on esitatud sama näitaja väikesel maakondade kaardil.

Aluseks on **Tabel 15**. Rahvastik alalise elukoha ja vanuse järgi, 2000.

Diagrams

Thematic Maps

Thematic map 1. Counties and cities of Estonia, 2000

Map of administrative division of Estonia with the names, borderlines and areas of counties (15), and names of cities (42). Cities without municipal status are not marked on the map (in Lääne county — Lihula; in Valga county — Otepää; in Viljandi county — Abja-Paluoja and Karksi-Nuia; in Võru county — Antsla).
Based on **Table 2**. De facto and usual resident population of administrative units by sex, 1989, 2000.

Thematic map 2. Rural municipalities of Estonia, 2000

Map of administrative division of Estonia with the borders of counties and names and borders of rural municipalities (205). The names of towns which coincide with the names of rural municipalities are not marked on the map (in Pärnu county — Vändra town; in Rapla county — Kohila town and Märjamaa town).
Based on **Table 2**. De facto and usual resident population of administrative units by sex, 1989, 2000.

Thematic map 3. Population density in rural municipalities (inhabitants per km²), 2000

Usual resident population density of rural municipalities per 1 km² by density intervals. Estonian average population density is 30.3 inhabitants per km². Population density has been presented separately on the small map of counties.

Based on **Table 2**. De facto and usual resident population of administrative units by sex, 1989, 2000.

Thematic map 4. Rate of population change in rural municipalities, 1989–2000

Decrease (green) and increase (yellow) of usual resident population of rural municipalities by percentage intervals in 2000 compared with the 1989 Census results. Average of Estonia is 87.5%.

Based on **Table 4**. Change in de facto and usual resident population of administrative units, 1989–2000.

Thematic map 5. Proportion of population of cities and rural municipalities in counties, 2000

Proportion of usual resident population of cities and rural municipalities has been presented on the map of counties as a sector-diagram. Average of Estonia is 67.4% (population of cities).

Based on **Table 2**. De facto and usual resident population of administrative units by sex, 1989, 2000.

Thematic map 6. Males per 1,000 females in administrative units, 2000

Number of males in rural municipalities and cities per 1,000 females by number intervals. Predominance of males is indicated by blue and predominance of females by pink shade of colour. Average of Estonia is 856. The same indicator has been presented on the small map of counties.

Based on **Table 3**. Proportion of males and females in the population of administrative units, 1989, 2000.

Thematic map 7. Proportion of population aged 0–14 in administrative units, 2000

Proportion of children in usual resident population of cities and rural municipalities by percentage intervals. Average of Estonia is 18.1%. The same indicator has been presented on the small map of counties.

Based on **Table 15**. Population by the usual place of residence and age, 2000.

Thematic map 8. Proportion of population aged 15–64 in administrative units, 2000

Proportion of young and working-age people in the usual resident population of cities and rural municipalities by percentage intervals. The same indicator has been presented on the small map of counties.

Based on **Table 15**. Population by the usual place of residence and age, 2000.

Thematic map 9. Proportion of population aged 65 and older in administrative units, 2000

Proportion of pension-aged persons in the usual resident population of cities and rural municipalities by percentage intervals. The same indicator has been presented on the small map of counties.

Based on **Table 15**. Population by the usual place of residence and age, 2000.

Mõisted

Ajutise äraoleku kestus — aeg (kuudes) isiku alalisest elukohast (ajutisest) lahkumisest kuni loendusmomendini. Lühiajalise (alla ühe kuu) kestnud äraoleku korral märgiti kestuseks üks kuu. Üldhariduskoolide õpilased, kes elasid õppimiskohas, loeti vanemate elukohast ajutiselt äraolevaks alates kooliaasta algusest.

Ajutiselt äraolev rahvastik — isikud, kes olid loendusmomendiks oma alalisest elukohast pidevalt ära olnud vähem kui ühe aasta ja kes õöl vastu 31. märtsi 2000. a kell 00.00 viibisid:

- eluruumides väljaspool oma alalise elukoha järgse linna või valla piire;
- hotellides ja teistes majutusasutustes, tervishoiu-, hoolekande- jm asutustes olenemata asutuse asukohast (kas samas linnas, vallas või mujal);
- üldhariduskoolide ühiselamutes või mujal väljaspool kodu seoses õppimisega (v.a kõrgkoolides, keskeri- ja teistes kutseõppeasutustes õppijad);
- kasarmutes jm seoses ajateenistuse, kaitseväge kordusõppuste või alternatiivteenistusega;
- politseiasutuses kinnipeetavana või kinnipidamisasutuses eeluurimisel olevana;
- kinnipidamisasutustes karistusajaga vähem kui üks aasta;
- reisijana rahvusvaheliste liinide sõidukites;
- välisriikides.

Ajutiselt äraolevaks ei loetud isikuid, kes loendusmomendil ei olnud alalises elukohas, kuid viibisid samas linnas või vallas mõnes teises eluruumis, samuti neid, kes viibisid mõnes teises linnas või vallas kohtades, kus neid loendada ei olnud võimalik või kus loendust polnud ette nähtud (olid tööl, olid kuhugi teel jne).

1989. aastal loeti ajutiselt äraolevaks isikud, kelle äraolek kestis kuni 6 kuud.

Alaline elukoht (püsielukoht) — haldusüksus või asula, kus asub eluruum, milles isik loenduse ajal püsivalt elas. Alaliseks elukohaks loeti koht, kuhu isik kavatses jääda elama või kus ta oli elanud vähemalt ühe aasta (1989. aastal vähemalt 6 kuud). Isikul, kellel oli rohkem kui üks elukoht, loeti alaliseks elukohaks koht, kus elas tema leibkond. Õppimiskohas elavate kõrgkoolide, keskeri- ja teiste kutseõppeasutuste õpilaste alaliseks

elukohaks loeti õppimiskoha asukoha eluruum (mitte vanemate elukoht). Institutsioonis (hoolekandetasutused, kinnipidamisasutused jm) rohkem kui aasta elanud või sinna rohkem kui aastaks jäävate isikute alaliseks elukohaks loeti institutsioon (1989. aastal oli ajapiiriks 6 kuud). Ajateenijate alaliseks elukohaks loeti koht, kust nad ajateenistusse läksid. Loenduse ajal välisriigis viibinud Eesti Vabariigi diplomaatiliste ja konsulaaresinduste diplomaatilise personali ja nende leibkonnaliikmete alaliseks elukohaks loeti nende elukoht Eestis. Kodutute alaliseks elukohaks loeti asula, kus nad loendati.

Alaline rahvastik — loendusmomendil antud haldusüksuses või asulas kohalolevad alalised elanikud ja lisaks sealt vähem kui aasta ajutiselt äraolevad elanikud. 1989. aasta loendusel loeti ajutiseks äraolekuks kuni 6 kuud.

Eestis ajutiselt viibiv rahvastik — välisriikide alalised elanikud, kes loendusmomendil viibisid Eestis.

Faktiline rahvastik — loendusmomendil antud haldusüksuses või asulas kohalolevad alalised elanikud ja lisaks seal vähem kui aasta ajutiselt elanud isikud. 1989. aasta loendusel loeti ajutiseks kohalolekuks kuni 6 kuud.

Linnade rahvastik — omavalitsuslike linnade rahvastik. Vallasiseste linnade rahvastik on esitatud valdade koosseisus.

Loendusmoment — loendusega kogutavate andmete fikseerimise kuupäev ja kellaaeg. 2000. ja 1989. aasta rahvaloenduse loendusmomendid olid vastavalt 31. märtsil 2000 kell 00.00 ja 12. jaanuaril 1989 kell 00.00.

Rahvastik — kui pole täpsustust “faktiline” vm, siis tähendab see alalist rahvastikku.

Teadmata — tabeli rida või veerg “teadmata” hõlmab juhtumeid, kus vastus on loenduslehele märkimata või on märgitud vastus, mida ei ole võimalik üheselt tõlgendada.

Valdade rahvastik — valdade asulates (vallasisesed linnad, alevid, alevikud ja külad) elav rahvastik.

Vanus — isiku vanus on arvestatud täisaastates. Vanuse esitamise aluseks on 2000. aastal 31. märts ja 1989. aastal 12. jaanuar. Alla üheaastaste laste vanuseks on 0 aastat.

Definitions

Age — person's age has been given in full years as at 31 March in 2000 and as at 12 January in 1989. The children less than 1 year of age are recorded as 0 year of age.

De facto population — permanent residents in the certain administrative unit or settlement and in addition residents having temporarily lived there for less than one year. In 1989 temporary presence was regarded up to 6 months.

Duration of temporary absence — period (in months) from the person's departure of his/her permanent place of residence up to the moment of Census. In the case of short-term (less than one month) absence, one month was recorded as a period of absence. Pupils of general educational establishments living in the study area were regarded as temporary absent from their parents' place of residence since the beginning of school-year.

Moment of Census — the date and the time fixing the data collected by the Census. The moments of Census of the 2000 and 1989 Population Censuses were correspondingly on 31 March 2000 at 00.00 and on 12 January 1989 at 00.00.

Permanent place of residence — administrative unit or settlement, where the dwelling in which the person permanently lived during the Census, is located. The permanent place of residence is the place where the person intends to live or where he/she has lived at least one year (in 1989 at least 6 months). For the person who had more than one places of residence the permanent place of residence was the place where his/her household was living. The permanent place of residence of university students and of pupils of professional secondary or other vocational educational institutions living in the study area is the dwelling where the studies take place (not the place of residence of parents). The permanent place of residence of persons, who have lived in an institution (social welfare institutions, prisons) for more than a year or who will stay there for more than a year, is the institution. (In 1989 the time limit was 6 months.) The permanent place of residence of persons in military service is the place where they departed from for military service. The permanent place of residence of diplomatic staff of diplomatic missions and consular posts of the Republic of Estonia and their household members who were in a foreign country during the Census is their place of residence in Estonia. The permanent place of residence of homeless persons is the settlement where they were enumerated.

Population — if the term has not been specified ("de facto", etc.) it refers to usual resident population.

Population of cities — population of city municipalities. Population of cities without municipal status has been included in the population of rural municipalities.

Population of rural municipalities — population living in settlements of rural municipalities (cities without municipal status, towns, small towns and villages).

Temporarily absent population — persons who had been continuously absent from their permanent place of residence for less than one year and who at 00.00 on the eve of on 31 March 2000 were:

- a) in dwellings outside the city or rural municipality of their permanent place of residence;
- b) in hotels and other accommodation establishments, in health care, social welfare and other similar institutions, regardless of the location of the institution (whether in the same city, rural municipality or elsewhere);
- c) in hostels of general educational establishments or elsewhere outside home in connection with studies (except students in higher, professional secondary and vocational educational establishments);
- d) in military barracks or other rooms in connection with compulsory service in armed forces or training for reserve or alternative service;
- e) detained in a police authority or under preliminary investigation in penal institutions;
- f) in prison in connection with imprisonment for a criminal offence (term of punishment less than a year);
- g) as a passenger on international coaches, trains, aircraft and ships;
- h) in a foreign country.

Temporarily resident population in Estonia — permanent residents of foreign countries who were in Estonia at the moment of Census.

Unknown — the table's row or column "unknown" includes cases where the answer has not been recorded on the questionnaire or the answer that has been recorded is ambiguous.

Usual resident population — permanent residents in the certain administrative unit or settlement at the moment of Census and residents temporarily absent from there for less than a year. In 1989 temporary absence was regarded up to 6 months.

**Kogumik esitab 2000. aasta rahva ja eluruumide loenduse tulemusi
Eesti kohta tervikuna ja haldusüksuste kaupa.
Tulemusi võrreldakse 1989. aasta rahvaloendusega.
Info on antud ülevaatenähtena, tabelite, diagrammide ja teemakaartidena.
Lisatud on mõistete selgitused.
Mõeldud valdkonnast lähemalt huvitatuile.**

**The publication presents the results
of the 2000 Population of Housing Census on Estonia
as a whole and by administrative units.
The results are compared with the 1989 Population Census.
The information is provided in an overview,
tables, diagrams and thematic maps.
Explanations of terms have been added.
Addressed to the user more interested in the subject.**
