<i>Jürgen Hilger</i> . Oil shale has more than energy – enhance the value by using the minerals in building materials	1
*	
<i>Sigrid Hade, Alvar Soesoo</i> . Estonian graptolite argillites revisited: a future resource?	4
<i>Jianlong Liang, Dazhen Tang, Hao Xu, Shu Tao, Chenchen Li, Mingfu Gou</i> . Formation conditions of Jimusaer oil shale at the northern foot of Bogda Mountain, China	19
<i>Cem Erdoğan, Levent Ballice, Mehmet Sağlam, Mithat Yüksel</i> . Fast pyrolysis and co-pyrolysis of Göynük oil shale (Turkey) and polypropylene in free falling reactor (FFR)	30
<i>Xiangxin Han, Qingyou Li, Mengting Niu, Yiru Huang, Xiumin Jiang</i> . Combined fluidized bed retorting and circulating fluidized bed combustion system of oil shale: 1. system and key issues	42
<i>Awni Al-Otoom, Mohammad Al-Harabsheh, Marwan Batiha</i> . Sintering of Jordanian oil shale under similar conditions of fluidized bed combustion systems	54
<i>Changtao Yue, Yang Liu, Yue Ma, Shuyuan Li, Jilai He, Dengke Qiu</i> . Influence of retorting conditions on the pyrolysis of Yaojie oil shale	66
<i>Janek Reinik, Ivo Heinmaa, Johannes Ritamäki, Dan Boström, Eva Pongrácz, Mika Huuhtanen, William Larsson, Riitta Keiski, Krisztián Kordás, Jyri-Pekka Mikkola</i> . Direct CO ₂ sequestration onto alkaline modified oil shale fly ash	79
<i>Lembi-Merike Raado, Rein Kuusik, Tiina Hain, Mai Uibu, Peeter Somelar</i> . Oil shale ash based stone formation – hydration, hardening dynamics and phase transformations	91
